CSC *PTMS*

Property Tax Software for State and Local Compliance

CSC PTMS® automates return filing, assessment validation, payments, projections, accruals, and document management for all industries, including complex and state assessed property.

Give everyone access to only the data they need, shorten processes, automate steps, notifications, and more.

Why you need it

CSC PTMS addresses challenges like manual key entry errors, and duplicated or missing data. It'll also save you time that's lost getting information from other departments.

Using CSC PTMS ensures you can effectively manage your property tax work and risk with a single solution, eliminating instances of late filings and non-compliance—no matter your size or industry!

We're ready to talk.

CSC PTMS's easy-to-use tools make managing property tax easier

Automate return filing
Slash the time you need to devote to returns and minimize overtime.

Access jurisdiction tax data
Reduce information gathering and research time with preloaded jurisdiction tax data.

Prevent assessor overvaluation
Ensure proper valuation with historical data and one-step property value calculations.

Allocate property easily
Allocate property in bulk or individually to the appropriate sites or jurisdictions.

Identify best known value
Save time when researching, forecasting, or adjusting accruals with CSC PTMS's frequent Best Known Value field updates.

Integrate with accounts payable
Export payment requests to any accounts payable system with our interface.

Automate reporting
Create custom reports with the PTMS report writer that includes branding and email distribution.

View audit history
View comprehensive audit log history to ensure data integrity and Sarbanes-Oxley compliance.

Grant roles and permissions
Grant role-based security to each unique user.

Link attachments
Quickly link files to property tax data.

Make batch updates
Quickly filter groups of licenses and perform mass updates with bulk edit tools.

We're ready to talk.
